ENSIAS software engineering student experienced in delivering business web and mobile applications from requirements analysis to production. Seeking a six-month final-year internship from January 18, 2027 · Rabat · Internationally mobile.

Experience

MEGA RAYONNAGE | Software Engineering Intern — Intelligent ERP/CRM

July – September 2026 | Tangier, Morocco

- Designed, built and deployed a web and mobile ERP/CRM for 20+ users across two sites, consolidating processes previously spread across Excel, WhatsApp, paper records and heterogeneous systems.
- Modelled workflows for lead management, versioned quotations, orders, planning, labour hours, productivity, invoicing and financial reconciliation.
- Delivered real-time executive dashboards and Gemini-powered monthly reports; the platform uncovered four discrepancies in legacy tools, subsequently confirmed through business review.
- Secured and industrialised the platform with JWT, role/site/team-based access control, mutation auditing, Pytest, Docker, GitHub Actions, Apache and HTTPS.

NOKIA | Software Engineering Intern

July – August 2025 | Salé, Morocco

- Built an end-to-end local web prototype that transformed unstructured WhatsApp histories into searchable data for tracking incidents, maintenance, upgrades and alerts.
- Implemented SQLite ingestion and normalisation, a REST API with search, filters, timelines and KPIs, and a React interface; validated the prototype with the supervisor in a controlled environment.

JavaScript · React · Node.js · Express · SQLite · API REST

Projects

MINDARENA | Microservices Web Platform

- Co-developed a functional competitive-challenge MVP with submissions, voting, comments, XP, ranks, leaderboards, notifications and chat.
- Owned secure identity (RS256 JWT), progression and leaderboards, and contributed to the Spring Cloud migration, Redis caching, RabbitMQ events, testing and industrialisation.

Java 21 · Spring Boot · Spring Security · MariaDB · Redis · RabbitMQ · Docker

EPIDEMIC TRACKING | First-year Project — Mobile Application

- Built a functional epidemic-tracking application for citizens, physicians and administrators as part of a team.
- Developed the citizen and physician mobile journeys, reporting forms, dashboard and risk-zone mapping; contributed to UML, API integration and final testing.

React Native · REST API · UML · Mapping

INCLUSIVE SPORTS SIMULATOR | Individual TIPE — Recognised as Best TSI TIPE

- Conceived an immersive sports simulator for people with disabilities, combining virtual reality with a platform suspended by four synchronised cables.
- Produced the engineering study and 3D model covering functional architecture, kinematics, mechanical and energy sizing, material selection, structural analysis and PI control.
