Anas Houhou

Software Engineering Student — Backend · Full-stack

Rabat, Morocco · Internationally mobile · +212 666-999597 · anas_houhou@um5.ac.ma
Portfolio · GitHub · LinkedIn · ArtStation

ENSIAS software engineering student experienced in delivering business web and mobile applications from requirements analysis to production. Seeking a six-month final-year internship from January 18, 2027.

Experience

Mega Rayonnage — Software Engineering Intern Jul. – Sep. 2026 · Tangier
Production web and mobile ERP/CRM

- Owned the technical design and end-to-end development of an ERP/CRM deployed to 20+ users across two sites.
- Unified lead management, quotations, orders, planning, labour hours, productivity, invoicing and financial reconciliation previously spread across Excel, WhatsApp, paper records and multiple systems.
- Delivered real-time dashboards and Gemini-powered monthly reports; the platform uncovered four legacy-tool discrepancies, subsequently confirmed through business review.
- Hardened production with JWT, role/site/team permissions, mutation auditing, Pytest, Docker, GitHub Actions, Apache and HTTPS.

Technologies: Python, FastAPI, TypeScript, React Native, Expo, PostgreSQL, Gemini API, Docker.

Nokia — Software Engineering Intern Jul. – Aug. 2025 · Salé
Local field-operations analytics prototype

- Owned a prototype turning unstructured WhatsApp histories into actionable data for tracking incidents, maintenance, upgrades and alerts.
- Built the SQLite pipeline, REST API (search, filters, timelines and KPIs) and React interface; validated the solution with the supervisor in a controlled environment.

Technologies: JavaScript, React, Node.js, Express, SQLite, REST API.

Projects

MindArena — Microservices web platform

- Co-developed a competitive-challenge MVP with submissions, voting, XP, ranks, leaderboards, notifications and chat; owned RS256 JWT identity, progression, leaderboards and part of the industrialisation.

Technologies: Java 21, Spring Boot, Spring Security, MariaDB, Redis, RabbitMQ, Docker.

Epidemic Tracking — First-year academic project

- Developed the React Native citizen/physician journeys, forms, dashboard and risk-zone mapping as part of a team; contributed to UML, API integration and final testing.

Inclusive Sports Simulator — Individual TIPE recognised as best TSI TIPE

- Designed a VR simulator with a four-cable platform; produced the engineering study and Blender model covering kinematics, sizing, structural analysis and PI control.

Skills

Core: Python, Java, C, TypeScript, SQL · **Backend:** FastAPI, Spring Boot, Spring Security, Express, REST APIs, SQLAlchemy
Frontend/mobile: React, React Native, Expo · **Data:** PostgreSQL, MariaDB, SQLite
Engineering: Docker, GitHub Actions, Git, Linux, Apache, Pytest · **Familiar with:** Kubernetes, Jenkins, Flutter

Education

ENSIAS — Engineering Degree in Software Engineering · 2024 – 2027 · Rabat
Centre CPGE Tétouan — TSI Preparatory Programme · 2022 – 2024 · Tétouan

Leadership

ADEI — Vice President · Nov. 2024 – Nov. 2025 · Reference 3D model for the student lounge
Forum GENI Entreprises — Design and Outreach Lead · Nov. 2024 – Present
Junior Entreprise ENSIAS — Public Relations · Mar. 2025 – Jan. 2026

Languages and interests

Arabic (native) · French and English (professional proficiency) · Digital creation and 3D art · Immersive technologies · History · Geopolitics
